

American Economic Association LaTeX Style Guide for Authors

GUIDELINES FOR PREPARATION OF ACCEPTED MANUSCRIPT

This style guide may be used for the following AEA journals:

- AER: *The American Economic Review*
- P&P: *Papers and Proceedings*
- AEJ: *American Economic Journals*
- JEL: *Journal of Economic Literature*

Your careful adherence to this style guide is greatly appreciated and will expedite the publication of your manuscript.

- (i) Download the LaTeX author package from: www.aeaweb.org/templates/latex_templates.zip. Install the files per accompanying instructions. There is a template for each journal to guide your manuscript preparation.
- (ii) Manuscript Preparation: (For detailed AER/AEJ style information, please refer to style guide at www.aeaweb.org/aer/styleguide.pdf)

Fonts: Your article will be set in Computer Modern by default (except P&P articles which are set in Times by default). To change to a Times font, simply uncomment the `mathtime` package. If you have difficulties with this package, you may need to alter the package options to suit your installation or you may need to correct `miktex` font configuration issues. See the technical support page at www.aeaweb.org/templates/technical_support.pdf for detailed information if needed. Alternatively, just comment out the `mathtime` package. In either case, the correct font will be substituted during the production process.

Packages: The use of packages should be limited to those packages that provide core functionality, such as `amsmath`, `graphicx`, `natbib`, and `harvard`. Avoid the use of packages that change the style (`geometry`, `fancyhdr`, `setspace`, etc.). Avoid the use of packages that use `postscript` to draw diagrams or label graphics (`pstricks`, `psfrags`, and most other packages with `ps` or `eps` in the name). If it is necessary to use such packages, then render the result to a high quality graphic and include the graphic in your manuscript, but do not include the package and its commands in your manuscript. The journal production is NOT done in LaTeX and most package-based commands will not translate to the production environment.

Frontmatter: Please follow the sample in the template. In particular, please note:

- The `date` command is used in draft mode to print a revision date, for your convenience.
- Please supply a short title for the running head using the command so named.
- Please do not footnote the title.
- All authors names should be typed within a single author command.

- Authors' contact information and acknowledgements should be given in a single footnote following the last author's name. Please supply institution name, full mailing address, and e-mail address for each author. For authors affiliated with more than one institution, please supply the names of all institutions, but give only one mailing address and one e-mail address. Please include your department in your mailing address, if appropriate. This material should be in a single paragraph.
- An abstract is required. For detailed guidelines on producing a high-quality abstract, please see our abstract style guide at: www.aeaweb.org/aer/abstracts.html.

Class Options: `finalmode`, `reviewmode`, `draftmode`:

- The class has options `finalmode`, `reviewmode`, and `draftmode` for final submissions, blind review copy, and your personal working copy, respectively.
- To prepare copy for reviewers, simply select the `reviewmode` class option and recompile your document.
- Draft spacing is controlled in the preamble and is set to 1.5 lines by default. You may change this to any positive, real number within reason. Draft spacing is only used when the `draftmode` class option is set.
- Do not use double-spacing packages. The three modes described above handle these issues automatically. Simply select the desired class option and recompile your document.

Document Body:

- Footnotes: Please use the usual footnote command (not endnotes).
- Please use `aea.bst` for proper reference formatting, if you are using `bibtex`. For sample references, if needed, please see www.aeaweb.org/sample_references.pdf.

Figures and Tables:

- Figures and tables should be included within the document as floats with a short caption. The caption should not be part of the figure graphic. Place figure captions below the figure. Place table captions above the table. You may place figures and tables within the document in the approximate location where you would like them to appear. Editors will determine final location.

Backmatter:

- Appendix: Authors are encouraged to use an Appendix for technical proofs and derivations that can be separated from the main text. AER appendixes longer than five pages will appear online and must be sent as a separate file.
- References: Use full names of authors or editors (last names first), using initials only if that is the usage of the particular author/editor. List all author/editors up to/including ten names. Authors of articles and books and material without specific authors or editors, such as government documents, bulletins, or newspapers, are to be listed alphabetically. Please refer to the sample references available at www.aeaweb.org/sample_references.pdf.

- Data sources: Please see data availability policy at: www.aeaweb.org/aer/data.php.

Manuscript Delivery: please provide the following files in a ZIP archive (or other archive format) to prevent your files from being damaged during e-mailing:

- PDF of the manuscript will be used to guide editors in the preparation of your manuscript for publication (but not as camera-ready copy). Use the class option `finalmode` to prepare this final copy.
- TEX source file for your manuscript.
- aux file from most recent compile.
- bbl file from most recent compile, if using bibtex.
- Figure source files (pdf, eps, ai, ppt, or wmf).
- Table source file if available in Excel.

Copyright: EACH author/coauthor will receive a copyright transfer agreement which must be signed and returned. A paper for which there is no signed copyright transfer agreement cannot be published. Please call the editorial office (412) 432-2311 if you foresee any problems involving this requirement or if you have any questions.
