

Early Childhood Human Capital and Development: Corrigendum[†]

By TODD SCHOELLMAN*

In Schoellman (2016) I document that the adult outcomes of refugees are independent of their age at arrival to the United States for children who arrive by age six. However, I mistakenly provided outdated versions of several figures and tables to the journal during the publication process. The final version of the results, as described in the text and implemented in the replication file, includes an additional year of data for the main results (from the 2012 American Community Survey) and slightly different controls. These updates change point estimates slightly but do not affect the substantive conclusions of the paper. This corrigendum includes the correct, final version of the figures and tables to eliminate the discrepancy between the text/replication files and the published results.

I. Corrected Figures and Tables

TABLE 1—EFFECT OF AGE AT ARRIVAL ON WAGES AND SCHOOLING

	Vietnamese	Chinese	Lao	Hmong	Khmer	Pooled
<i>Dependent variable: log-wages</i>						
Estimate	-0.0003	-0.0042	-0.0123	0.0393	0.0145	0.0031
Standard error	(0.0164)	(0.0202)	(0.0219)	(0.0273)	(0.0234)	(0.0099)
Observations	1,202	500	384	220	267	2,573
<i>Dependent variable: Years of schooling</i>						
Estimate	0.0470	-0.1325	-0.0272	0.1258	0.1076	0.0280
Standard error	(0.0484)	(0.0877)	(0.0900)	(0.1005)	(0.0616)	(0.0324)
Observations	1,984	757	673	362	461	4,237

Note: Reported effects control for age, state of residence, gender, and ethnic group fixed effects.

*Schoellman: Research Department, Federal Reserve Bank of Minneapolis, 90 Hennepin Ave., Minneapolis, MN 55401 (email: todd.schoellman@gmail.com). I am indebted to Chase Coleman for bringing the issue underlying this corrigendum to my attention.
