**Reference:** Disclosure statement: “The Impact of AIDS Treatment on Savings and Human Capital Investment in Malawi”

As stated in the introductory footnote: I, Hans-Peter Kohler received for this research and the Malawi Longitudinal Study of Families and Health (MLSFH), on which these analyses are based, from the U.S. National Institutes of Health (NIH). Specifically, the MLSFH has received support through National Institute of Child Health and Development (grant numbers R03HD058976, R21HD050652, R21HD071471, R21AG053763, R01HD044228, R01HD053781), the National Institute on Aging (grant number P30 AG12836), the Boettner Center for Pensions and Retirement Security at the University of Pennsylvania, and the National Institute of Child Health and Development Population Research Infrastructure Program (grant number R24 HD-044964), all at the University of Pennsylvania.

The data collection of the MLSFH has been approved by the IRB at the University of Pennsylvania and the National Health and Science Research Committee (NHSRC) in Malawi.

Except for the research funding specified on the title page (quoted above), I have not received significant financial support from other “interested parties” as defined by the AEJ Disclosure Policy. I also have no other disclosures according to this policy.

Best wishes,

Hans-Peter Kohler  
F. J. Warren Professor of Demography  
Professor of Sociology
