

The research described in this paper (Does the Squeaky Wheel Get More Grease? The Direct and Indirect Effects of Citizen Participation on Environmental Governance in China) was funded by National Science Foundation of China (Grant No. 71825005, 72161147002, and 72004024) and the Energy Policy Institute at UChicago (EPIC). The author has no other material or financial interest to disclose.

Prior to launching the experiment, we sought clarification on the status of the research from the Institutional Review Boards at the University of Chicago and the University of California, Santa Barbara. Because we did not collect data about or from individual human beings, both boards determined that this project is not considered research with human subjects (UChicago protocols IRB19-1744, and letter of determination dated October 18, 2019 from UCSB FWA#00006361).

A handwritten signature in black ink that reads "Mengdi Liu". The signature is written in a cursive, flowing style.

Mengdi Liu
