Disclosure Statement for: Distinguishing Common Ratio Preferences from Common Ratio Effects Using Paired Valuation Tasks

I declare that I have no relevant or material financial interests that relate to the research described in this paper. The experiment was reviewed and granted exemption by the Institutional Review Board at the California Institute of Technology under protocol number 21-1073.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles Sprenger". The signature is fluid and cursive, with a long horizontal stroke at the end.

Charles Sprenger
